PROJECTS

EPIC GAMES CLONE PROJECT

ITI Graduation Project

Worked on a team to develop a game project that was inspired by the mechanics and gameplay of an Epic Games title. Contributed to the design and development of the game, including creating original artwork and sound, balancing gameplay mechanics, and testing extensively to ensure the game was fun and engaging. Learned valuable skills in game development, teamwork, and project management while working on this project.

MOVIES PROJECT

Developed a simple movies website using React.js, a popular JavaScript library for building user interfaces. utilizing React components to create a dynamic and responsive user experience. Implemented APIs to fetch and display movie data.

AMAZON CLONE PROJECT

simple Amazon clone project using JavaScript, HTML, and CSS. Developed front-end features such as the shopping cart, and search bar. Utilized JavaScript libraries and frameworks to create a dynamic and responsive user experience.

LOST APP

Academy Graduation Project

The application aims to provide a specialized platform to find missing people

- Allows users to report a missing person or a found one by posting some information about that person including a photo of him/her.
- Applies AI face recognition to search the database and compare the faces of the lost people with the found people's faces.
    - o Technologies: Python, Flask, MySQL database.
    - o Grade: Excellent.
